EDUCATION

International Institute of Information Technology, Bangalore

July 2024 – June 2026

Master of Technology in Computer Science

3.36

Indian Institute of Information Technology, Raichur

Dec 2020 – May 2024

Bachelor of Technology in Computer Science

3.51

EXPERIENCE

Rolls-Royce India Pvt. Ltd.

Jan 2026 – June 2026

Apprentice

Bengaluru

- Delivered 2 Power Apps dedicated to employee social and physical well-being, leveraging the full Power Platform stack.
- Contributed to full-stack development and maintenance using Angular, performing bug fixes and QA testing.

Oracle Cerner Healthcare Solutions India Pvt. Ltd.

May 2025 – July 2025

Project Intern

Bengaluru

- Digitized 20 resources of the RAI spec into dynamic web forms, streamlining clinical data entry for the LTC EHR React app.
- Upskilled in Oracle's core tech stack: Oracle Cloud, OJET, Micronaut, and Visual Builder, for future projects.

GoLive Games Studios Pvt. Ltd.

May 2022 – May 2023

Game Programmer Intern

WFH

- Developed efficient C# scripts using the Unity API to add features and fix bugs in 2D and 3D early-stage to live projects.
- Reduced load times and latency by 70% on an Android mobile game by optimizing load-up sequence and caching.

PROJECTS

Static C++ Null Pointer Analyzer | C++, Clang, GCP, Docker | 📁 Repo 📁 Live

Sep 2025 – Dec 2025

- Engineered a C++ static analyzer that maps Clang ASTs to custom CFGs to detect null pointer risks, supporting various C++ constructs, including a web app with a code-editor and GraphViz-based visualization for the CFG.
- Containerized the analyzer and Web App into a multi-stage Docker image deployed on Google Cloud Run (GCP).

Sparrow VPS | Kubernetes, Docker, Gin (Go), FastAPI, Vue | 📁 Repo

Apr 2025 – May 2025

- Designed a scalable cloud-native Virtual Private Server to ease the containerization and deployment process of projects.
- Implemented 6 core services for managing the application life-cycle, including repository analysis for stack detection, automated image builds, efficient deployment and monitoring.

Concurrent TUI Banking System | C, Ncurses, pthread | 📁 Repo

Sep 2024 – Oct 2024

- Developed a high-concurrency system in C, using socket programming & multi-threading to support up to 512 connections.
- Ensured ease of use, data integrity and security by implementing an Ncurses TUI, single-session per user, record-level file locking for persistent storage, and RBAC with bcrypt password hashing.

EmpERP (Full Stack) | React, Spring Boot, MySQL | 📁 Repo

Aug 2024 – Oct 2024

- Developed a full-stack app with Spring Boot, React, and MySQL, featuring RESTful APIs with JWT for security.
- Integrated core features like employee onboarding, department management, and salary administration.

IIITR Connect (Attendance App) | Flutter, OpenCV, FastAPI, PostgreSQL | 📁 Repo FE 📁 Repo BE

Aug 2023 – Dec 2023

- Saved ~15 minutes per class session by automating student attendance with a facial recognition system.
- Designed and built a cross-platform Flutter mobile app with a secure authority-based RESTful API backend using FastAPI.

MENTORSHIP

Teaching Assistant

Jan 2022 – June 2022

Intro to Data Structures, Programming

IIIT Raichur

- Held 20+ interactive teaching sessions with students on various topics in data structures and C/C++ programming.

TECHNICAL SKILLS

Languages: C/C++, Python, Java, Go, C#, Dart, TypeScript/JavaScript, HTML/CSS, PHP, Bash

Frameworks & Libraries: React, Angular, FastAPI, Spring, Flutter, Three.js, Qt, Jasmine

Tools & Technologies: GCP, Docker, Kubernetes, PostgreSQL, Unity, Unreal, Power BI, Power Apps, Power Automate

RELEVANT COURSEWORK

- Data Structures
- Algorithms Analysis
- Artificial Intelligence
- Systems Programming
- Software Methodology
- Database Management
- Internet Technology
- Computer Architecture
